Edit items for main.js

(1) Add mijin node environment

*each two items below

// 185187 line

// 193764 line

var defaultMijin = '<http://xxx.xx.xx.xxx>';

// 185217 line

// 193899 line

```
var searchOnMijin = [{
  'uri': 'http://xxx.xx.xx.xxx',
  'location': 'ja'
},{
  'uri': 'http://xxx.xx.xx.xxx',
  'location': 'ja'
}];
```

// 185277 line

```
var mijin = [{
  uri: 'http://xxx.xx.xx.xxx'
},{
  uri: 'http://xxx.xx.xx.xxx'
}];
```

// 185172 line

// 193785 line

var mijinExplorer = 'http://xx.xxx.xx.xxx:7895/#/transfer/';

(2) Change the rental fee

NanoWallet is using the same rental fee as that of nem.

So change for mijin. *each two items below

// 184886 line

// 193597 line

var subProvisionNamespaceTransaction = 10 * 50000000;

// 193605 line

// 199359 line

var mosaicDefinitionTransaction = 10 * 50000000;

// 184879 line

// 193585 line

var rootProvisionNamespaceTransaction = 100 * 50000000;

(3) Activate mijin

// 255896 line

【Before】mijinDisabled: true

【After】mijinDisabled: false

3. Start NanoWallet

(1) Double click start.html or Nanowallet in the folder

(2) Click「Sign up」

(3) Click「Private key」

New to NEM?

Select a type of wallet to create

Simple wallet Private key wallet

Private key wallets contains a primary private key that you want to import.

Private key wallets use ONLY a password to encrypt the imported private key. Therefore it's crucial to select a SAFE password.

(4) Click「Ready」

It is recommended to disconnect from internet while creating your wallet and backing up your data.

< Go back

Ready

(5) Select「Mijin」and click「next」

Select a network

Select a network

(9) Click「I agree」

⚠ It is your responsibility to always make sure you have your private key backed up before sending any funds to your account.

By clicking below, you agree that you have your private key, password and wallet file backed up.

< Go back

I agree

(10) Download wallet file and make a backup.
Click 「I have my wallet file」

Account safety protocol

Please click below to download your wallet. It is the **.wlt** file used as a backup and to import back if your browser's local storage is erased.

Download wallet

If you don't get a backup **.wlt** file, click on button below to reveal the raw wallet data and create the file manually:

Show raw wallet file

Go back

I have my wallet file

(11) Make a back up a private key and password.
Click 「I have my private key and password」

(12) Read the caution and click 「Understood」

⚠ Wallets are stored **temporarily** in the browser local storage! Browsers can be configured (e.g. by add-ons) to clear the local storage at times. This will lead to the loss of the data and which can't be undone easily. In such a case, your wallets will be gone, so it is very important to make sure you have all needed information to restore your accounts.

Understood

(13) Click Login

(14) Select the wallet that you created in「Select wallet」

ウォレットの選択:

mijinウォレット

(15) Put your password and click「Sign in」

Select wallet:

Select a wallet in local storage

Password:

Enter your wallet password or passphrase

Sign In

Import Wallet

(16) Then you will see the Dashboard
