

# AWS Marketplace expands eligibility to include Japanese Software Vendors

## mijin Catapult (2.0) one of the first software solutions to be registered in Japan - Offering Free Trial Version -

**TOKYO – September 30, 2020** – Today Tech Bureau Holdings, Corp., a fintech and blockchain solutions company, announced that it has become one of the first companies in Japan to complete partner sign-up on AWS Marketplace\*, the online software store which Amazon Web Service (AWS) offers in 190 countries. Today, Tech Bureau Holdings launched mijin Catapult (v.2) on the cloud service platform.

*\*A curated digital catalog that users can use to easily find, purchase, deploy and manage third-party software and data they need to build solutions and run their businesses.*

mijin Catapult (v.2) has been upgraded in all aspects of functionality, performance and specifications from the mijin (v.1). In addition, the new version achieves major advances in solving both processing speed and scalability issues, by enabling token exchanges between different blockchains and batch processing of multiple transactions etc.

For this launch, we have prepared a free trial version with limited features to allow more AWS users to experience the design and development system in order to promote the adoption of blockchain.

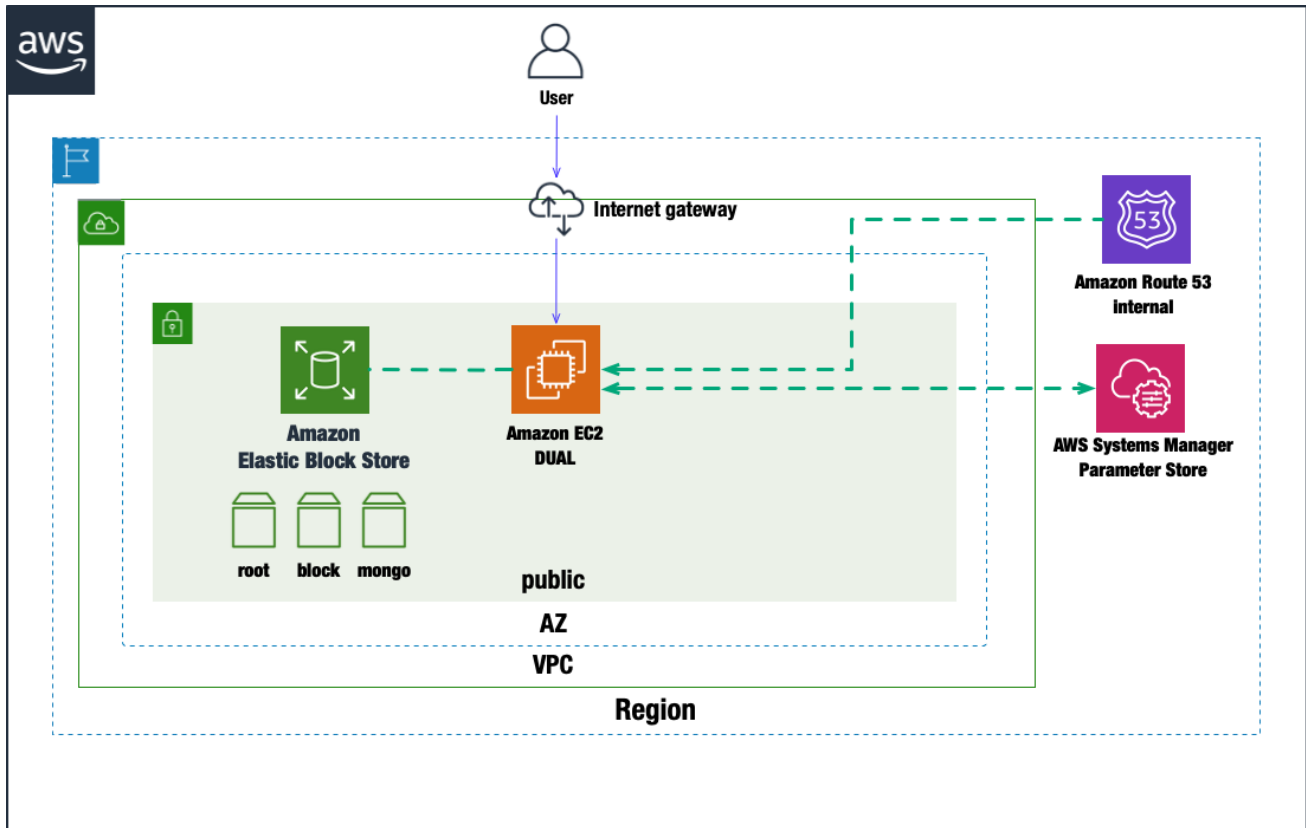

### Free Trial Version Overview

- Only one node (DUAL mode / API node with Harvest enabled)
- Deployment: The following configuration is completed in about 15 minutes.
- License fee: Free
- Infrastructure costs: AWS usage fees including Amazon EC2, Amazon EBS, Amazon Route53, and parameter store cost are needed
- Region: Provided to 16 regions worldwide

### <Restrictions >

- Deployment: public network only (IP address restriction is possible)
- The number of reserve currencies issued: 2,000 cat.currency

- Fee type: Required mode
- Version: mijin Catapult (2.0) (0.9.6.4) fixed
- Installation Procedure: <https://aws.amazon.com/marketplace/pp/B08HDPWV4L>

Premium Enterprise version will be launched in December of this year, along with the official Symbol release scheduled.

### About *mijin*

“*mijin*” is a software supports to create private blockchain environments that can be used inside and/or outside of corporates on the cloud and/or in an in-house data center. It can dramatically reduce costs by replacing conventional databases or accounting systems while contributing to higher security in which prevents from falsification. Additionally, it can be used to implement an environment with practically zero downtime. “*mijin*” is a general-purpose private blockchain product which uses the “NEM protocol” that is developed together with a “NEM” core developer. As a joint development, not only limiting to financial institutions, but it can be also implemented for electronic money, verification system, registration system, and logistics tracking.

### About Tech Bureau Holdings, Group

Tech Bureau Holdings, Corp., fintech and cryptocurrency group companies in Japan, the U.S., and Europe, develop software and services for cryptocurrency technology and blockchain technology, a so-called "Crypto-Fintech Lab". As a team and as a group, we have developed mijin, a private blockchain software. Tech Bureau Holdings, Corp. recently launched a one-stop solution, COMSA, which provides companies with consultation, expertise, and solutions to support their very own ICOs and implementations of blockchain technology into their businesses.

## **About NEM Group**

NEM Group supports the development of NEM NIS1 and Symbol from NEM, which launches towards the end of 2020. Symbol is the next-generation enterprise-grade blockchain solution from NEM, purpose-built for Enterprise adoption. NEM NIS1 (XEM), is NEM's original blockchain and launched in 2015. NEM Group comprises three separate entities: NEM Software, NEM Trading, and NEM Ventures which together will contribute to the development of blockchain technology for generations to come.

NEM NIS1's native currency is XEM, which can be 'harvested' using its POI (Proof-of-Importance) algorithm. NEM Group is a global blockchain development company headquartered in Gibraltar.
